Silicone Coating for PET

SEM243FG is a food grade silicone emulsion formulated with a 350 centistoke dimethyl fluid. SEM243FG complies with FDA & Health Canada regulations with respect to incidental contact with food. SEM243FG is an alkyl phenol free product.

This comes in either FG (food grade) or K (kosher) in the SEM243 variety. Dilution depends on what the customer requires. Could be anywhere from 1 to 10 % depending on customer requirements. This is a 20% active emulsion so it will have to be diluted with water.
